Push Sale Of Canadian Wheat

Western Canadian farmer organizations are on the right track in taking steps to launch a well defined and co-ordinated program of publicity with the promotion of greater consumption of high grade wheat in consumer countries as its objective.

Within a period of a couple of weeks two of the large farmer marketing organizations have given their blessing to such a move. These are the central organization of the Canadian wheat pools, whose plan to place an all-Canadian wheat loaf before the British consumer was endorsed at the annual meeting of the Saskatchewan Wheat Pool delegates and the United Grain Growers Ltd., who, at their annual meeting in Winnipeg sponsored a publicity program for Canadian wheat overseas.

Briefly, the U.G.G. Ltd. propose to interest boards of trade and other organizations throughout the prairie provinces to sponsor a request to the Federal government to set up a special sales promotion body to be known as the Canadian Wheat Institute with offices in consumer countries, the objective being to develop greater consumption of high quality wheat, which, of course, means wheat grown in Canadian fields.

The necessity for stimulating overseas consumers' interest is cited in the following quotation from the directors' report at the annual meeting of the Saskatchewan Wheat Pool: "In spite of the fact that Great Britain remains the best Canadian overseas customer for Canadian wheat, our wheat is invariably used only for blending with other wheats, particularly in the English mills. The British peoples generally are not familiar with the high quality of bread which can be baked from Canadian flour."

In support of the argument that a publicity campaign should be conducted in Great Britain, figures were quoted at the U.G.G. convention to the effect that while world consumption of wheat has dropped 31 per cent. in the past five years, Canadian wheat exports have been lowered by 49 per cent. in the same period.

While this may be true, it does not necessarily mean, however, that Canada is not holding her own in competition with other wheat exporting countries as total exports have dropped rather than total consumption due to the self-sustaining efforts of a number of the former customer countries in Europe. It does demonstrate, on the other hand, a material reduction of consumption of wheat, during the period under review.

Unfortunately, there is evidence that there is actually a reduction of consumption of wheat in Great Britain, Canada's best customer for high grade wheat. Representatives of the Scottish Co-operative Wholesale Society, while in Western Canada this summer, testified that while the Scotchman insists upon bread made of wheat of high protein content, as a result of which bread sold by the Co-operative's affiliates and subsidiaries contains 93 per cent. Canadian wheat, he is also eating less bread than formerly and, incredible though it may sound, is consuming less porridge. The Caledonian is substituting more expensive fruit, bread and eggs and other commodities, for a percentage of his erstwhile substantial diet of bread and oatmeal.

There are indications that a similar situation exists in England, where the popular taste is for a lower grade loaf than the Scotchman demands, for within the past year the British millers have found it advisable to institute a five-year advertising program at considerable expense in an effort to persuade the population south of the Tweed and the Cheviots that they should eat more bread.

With many of the former markets virtually closed to Canadian wheat and the British market showing a tendency to shrink, due to changing dietetic tastes, or whatever the cause may be, the outlook is not reassuring to the Western Canadian farmer.

The farmer organizations are becoming alive to the need for taking some steps to deal with these conditions and it is to be hoped that some effective program can be devised with all interests working together to a common aim.

In some quarters it is suggested that this is an opportunity for the Canadian Wheat Board to take the initiative in co-operation with the Department of Trade and Commerce. It is pointed out that the Wheat Board, under the Canada Wheat Board Act, is vested with wide enough powers in section 8, sub-section B, which gives the board authority "to sell and dispose of, from time to time, all wheat which the board may acquire for such price as it may consider reasonable with the object of promoting the sale and use of Canadian wheat in the world markets."

Some recent experiments in the home market show that the public will respond to a loaf made more attractive by flavoring or other devices and it is possible that similar efforts to woo the British consumer would pay dividends. At any rate it is worth a trial.

Unique Picture Gallery

Has Been Hobby Of Hotelkeeper For 35 Years

Trail, a little mining town in British Columbia, boasts a unique picture gallery. It is owned by Pete Levesque, a hotelkeeper, who has made it his hobby for 35 years, and it covers every inch of wall space in his lobby.

The gallery includes a photograph of every prominent man or woman who has visited Trail since 1900, and many of the photographs are autographed. All carry a short biography of the subject in Mr. Levesque's spidery writing, each ending with the word "died," followed by a blank space to be filled in when the time comes. Some of the subjects have thought this meticulous attention to detail a trifle premature.

The large, white, funnel-shaped "blossoms" of the calla lily are not the true flowers at all, but outer leaves. The real flowers are tiny, inconspicuous things, crowded together on the club-like spadix in the centre.

It has been estimated that twice as many boys as girls figure as victims of road accidents, while eight times as many boys as girls are drowned.

Told Astonishing Story

Fishermen On Caspian Sea Marooned For Five Days

Thousands of Caspian fishermen told an astonishing story of having been marooned on the bottom of the sea for five days, dispatches to Moscow stated.

Their report was that at the busiest period of the fishing season the sea itself retired from under the fleet.

It receded along 150 miles of the northern shore line of the Caspian Sea, leaving the ships high and dry several kilometres from solid earth. Airplanes dropped food to the marooned men until the tide flowed back and allowed them to refloat their ships.

Language Dying Out

Maxims are ceasing to talk Maax in spite of the efforts of enthusiasts to keep the language alive. There was not a single aspirant this year for a prize for the best scholar in the Maax language offered at King William's College in the Isle of Man.

Arithmomania is a strange malady. The sufferer is obsessed with uncontrollable desire to count things.

Divining Rod For Brain

Will Detect Tumor Too Small Even For X-Ray

Divining rod for the human brain which can detect tumors too small for the X-ray to reveal has been developed by Dr. Charles A. Elsberg of the Neurological Institute of New York.

The new device literally smells out the tumors, Dr. Elsberg said in announcing his discovery at the New York Academy of Medicine.

Dr. Frederick Tilney, director of Research at the Institute, and other neurologists described it as a means of saving thousands of lives yearly.

Brain tumors long have been known to interfere with a person's sense of smell by pressing on the olfactory centres of the brain. Attempts to create a "scent yardstick" have been baffled, however, by the variability among individuals and in the same person at different times.

Dr. Elsberg said he had discovered this variability could be overcome by injecting an odor directly to the olfactory nerve while the patient held his breath. Under these conditions, he said, the quantity of scent required for recognition becomes constant for normal individuals.

Using a simple apparatus which pumps given quantities of an odor into either of both nostrils, he found in each case where a brain tumor was present the minimum amount of odor was greatly increased. Subsequent periods of olfactory fatigue were also lengthened.

Further investigation, he said, showed that comparison of the results from the two nostrils would indicate whether the tumor was on the right or left hemisphere, or how nearly it was centered.

Co-operate With Press

Says Hospitals Should Give Full Information To Newspapers

Hospitals should give the fullest co-operation to their local newspapers, Dr. Malcolm MacEachern of Chicago told delegates to the annual convention of the Alberta Hospitals Association in Calgary. All information, compatible with medical ethics, should be furnished the press on request, he said.

"The press has done much, and can do more," he added, "in building up public confidence in local institutions."

Dr. MacEachern is director of hospital activities for the American College of Surgeons.

Russians Take Up Golf

American Player Drove First Ball On Soviet Soil

One of the most expensive pastimes of the rich was introduced into the proletarian State when Robert Miller 3d of Duxbury, Mass., Princeton '31, drove the first golf ball on Soviet soil.

An interested crowd of Soviet officials watched the practice driving, with the head of the All-Union Sports Organization acting as caddy.

Leonard Macomber, Chicago golf course architect, was in Moscow negotiating with Soviet authorities for building three courses in Moscow.

Unique Design For Windows

South Africa's New Post Office Using Replicas Of Stamps

South Africa's new post office which is now under construction is to have stained glass windows in the form of enlarged replicas of the Union's halfpenny, penny, twopenny and fourpenny postage stamps. Interwoven with the stamp designs are representations of a streamlined train, airplanes, a motor ship, and a radio station emitting sparks. A pair of symbolic poles help to balance the design which are supported by medallions, sketches of mail coaches and other old methods of postal transport.—L. A. Barnes.

Making It Clear

Mose knocked the ashes from his cornob pipe and put it on the mantelpiece. "Mandy," he said, "I think I've givin' put on mah best clo's an go down to the theatre tonight to see de chorus ladies dance."

Mandy turned a stony eye on him. "Mose," she grumbled, "listen here. If dat am what you thinks, den you'd better put ag'in. Nigghah, you ain't gwine to put on nothin' to go no place, no time, to see nobody do nothin'! never, nobody, and no it does 'you understand'?"

To Learn English

In the last two years nearly 4,000 foreign girls have gone to England to become domestic servants, most of them being well educated and of good family, but adopted the means of improving their knowledge of English.

The invisible larvae of the clothes moth, and not the moths themselves, do the damage to clothing.

Fish can be kept fresh for three months by means of a new process of brine freezing perfected in England.

If You Eat Starches Meats, Sweats Read This

They're All Necessary Foods — But All Not Forming. Hence Most Of Us Have "Acid Stomach" At Times. Easy Now to Relieve.

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really acid indigestion — brought about by too many acid-forming foods in our modern diet. And that there is now a way to relieve this... often in minutes!

Simply take Phillips' Milk of Magnesia after meals. Almost immediately this acts to neutralize the stomach acidity that brings on your trouble. You "forget you have a stomach!"

Also in Tablet Form: Phillips' Milk of Magnesia Tablets are available in all drug stores everywhere. Each box contains the equivalent of a teaspoonful of Phillips' Milk of Magnesia.

MADE IN CANADA

England's Railway Program

Proposes To Spend \$150,000,000 In Next Five Years

England proposes to spend something like \$150,000,000 in the next five years on rehabilitating her railways. This is more than ever apparent how set in their ways the British people are. They refuse to admit that the railroad is doomed by the remorseless march of the automobile. They are going to do on a large scale—for England—what we are doing modestly over here in the way of streamlined trains and air-conditioned coaches.

The challenge to the motor car is all the more impressive because England is a small place. Virtually all of it is short-haul traffic, as we consider mileage in this country, and it is in this field that our own losses have been greatest. The longest English run, from London to Edinburgh, is a trifle shorter than from New York to Buffalo or Montreal, or the more distant London to Glasgow.

England has fewer automobiles than we have, but they manage to do a great deal of reckless driving with them, as their very high casualty lists prove. Perhaps that is why they want to encourage railroad traffic. — New York Times.

Increasing In Popularity

Recent Estimate Shows Canadians Are Eating More Bananas

Demonstrating the increasing popularity of bananas in the Canadian home is estimated by the Department of Trade and Commerce that the average Canadian family consumed one stem of bananas in the first nine months of 1935. Ten years ago the appetite for this fruit in the average Canadian family of five was limited to approximately one stem of bananas in 13 months. Canada imported 2,587,134 stems of bananas in the first nine months of the current year, while in the 12 months of the fiscal year ended March ten years ago, 2,465,925 stems were imported. The main feature of Canada's increasing popularity of bananas is that slightly more than 80 per cent. of this year's purchases came direct from Jamaica.

Java Has No Poor

Native Diet Is Frugal And Everyone Has Enough

Speaking of the world tour of Lord Baden-Powell and herself which recently concluded with their visit to Canada, Lady Baden-Powell mentioned their stay in Java, and added: "I might say there isn't a poor person in all of Java. Of course the native diet is frugal, a handful of rice and a couple of bananas is sufficient each day. But we could learn a lot from the attitude of these Eastern people. Their kindness, their friendly spirit and their goodness shine from their eyes."

The golfer had lost his ball, and, not unnaturally, was inclined to be annoyed with his caddy.

"Why didn't you watch where it went?" he asked.

"Well, sir," said the boy, "it don't usually go anywhere, and so it took me unprepared like."

Automobile skidding and its remedies will be discussed at the next assembly of the British Association for the Advancement of Science, in London.

Tung oil has been important in China over 5,000 years.

English Language Changes

Words Drop Out And Come Into Use Again

A sign of the way in which the English language changes is seen in the use of the word "trembler," when describing earthquakes. In the last few days it has frequently appeared in news dispatches, but we were unable to find it in the Shorter Oxford English dictionary or in the Century, though we thought it would surely be in the last.

We could find "trembler," that is, one who trembles, and "tremor," that is, an agitation of the limbs, or of the earth, but no "trembler." The Century dictionary quoted J. Milne's use of the word "tremor" as follows: "Modern research has shown a typical earthquake to consist of a series of small tremors succeeded by a shock or series of shocks."

The word was not in the body of the text of Webster's New International dictionary, either, but it was included in the footnotes, and this is what we read: "tremor—erroneous for trembler." And what is "trembler"? It is Spanish for earthquake, says Webster. From an old dictionary, the Standard, published in the nineties, we got a little more information. It contained "tremblers" as well as "tremors," the latter of which were defined as "tremors of the earth's surface in volcanic districts."

The word is Spanish, from "temblar"—without the "r"—meaning tremble. It was derived from South America. Apparently it was in common use in America, in its erroneous form, at the end of the last century, then dropped out of current speech, and has now made its reappearance, just like a dandelion in a lawn—Hamilton Spectator.

Wonderful Apple Crop

One Of The Best In History Of Eastern Canada

Nova Scotia's 1935 crop of apples, almost entirely produced in the famed Land of Evangeline, Annapolis and Cornwallis valleys, greatest apple producing section of the British Empire, has been harvested. While not coming up to expectations in quantity, the valley yield of high-class production, is considered by such outstanding fruit men as Harry O. Bishop, president of the United Fruit Convention at New Brunswick, A. Chase, Fort Williams; V. B. Leonard, Manning K. Ellis of the Acadia fruit export board and others, as one of the best in quality in the history of Eastern Canada.

Evidence of Nova Scotia's superiority in apple production is evidenced at the Imperial fruit show at Cardiff, Wales. While highest honors did not come to this province, exhibitors from the valley practically took the majority of prizes.

May Visit Canada

President Roosevelt Hopes That Wish To Pay Visit May Be Realized

A visit to Canada—and possibly some game fishing here—is one of President Roosevelt's hopes for the future.

But he emphasized that he had made no plans for the trip and that as far as he knew now, it still was just a hope.

The president disclosed his ambition at his press conference when his over-enthusiastic reporters called to report that he had accepted an invitation by Prime Minister Mackenzie King to visit him in Canada. Mr. King was an overnight guest of the president at the White House during negotiations over the Canadian-American trade agreement.

Mr. Roosevelt said he had wanted to go to Canada but saw no immediate chance of being able to do so. When told of reports that he was expected to fish for tuna in Canadian waters, he smiled and said he hoped they would come true.

More Statistics

"When one gets a piece of dust in his eye he should remember that the earth weighs 5,885,516,000,000,000,000,000 tons," says The St. Thomas Times-Journal, and the London Advertiser remarks it might also help to recall that there are roughly 2,000,000,000 people in the world ready and willing to pluck notes out of other folk's eyes.

No Cause For Worry

"It may be a million years," a member of the department of astronomy, University of Toronto, said, referring to the statement of St. James Jeans, British scientist, that the moon will soon split into pieces and bathe the earth in perpetual moonlight.

Canada's Chief Loss

In the event of Italy retaliating by refusing to buy from Canada the chief loss would be in wheat, according to the exports for the last fiscal year when wheat to the value of \$1,098,624 was shipped to that country.

Asia, with its 16,700,000 square miles, is the most populated continent. It has more than 954,000,000 inhabitants, or over half the population of the world.

The moon sometimes comes 30,000 miles closer to the earth than at other times. It does not travel in a perfect circle around the earth.

Poultry Congress In Leipzig

Exhibit Building In Berlin Was Destroyed By Fire

Owing to a serious conflagration in the city of Berlin, Germany, the large building in which the live bird exhibit of the Sixth World's Poultry Congress was to have been held in 1936 was destroyed by fire. As there was no other hall in Berlin large enough for the purpose, the Congress authorities decided to hold the Congress in Leipzig. According to official information, this arrangement will give better accommodation than was possible in Berlin, while at the same time the delegates will have every opportunity of seeing the sights in and around Berlin itself on the occasion of a pre-arranged visit. Provision is also being made for the delegates to visit the Olympic Games, which will be held on the outskirts of Berlin. A Canadian tour is being arranged, and already there have been some definite bookings and a large number of applications for information.

Made Noise Like 'Plane

Swarming Wasps Routed Pack Trains In B.C. This Year

Wasps were numerous throughout British Columbia this year. Hundreds of nests honeycombed the rocky ground of the Cariboo district and on Vancouver Island.

"You could stand still anywhere in the woods, listen quietly, and hear a humming like a flock of distant aeroplanes," a logger in the Courtenay district of Vancouver Island reported.

He told of finding an area where a bear had demolished a dozen nests in the space of a quarter of a mile, feasting on the young wasps it found.

Many nests were situated on the Forbidden Plateau and pack trails were often attacked by the stingers. Horses rear and plunge as the swarms sail in to the attack. The stings remain with the horses only a few minutes, however, and they are soon quietened.

Propane Gas Has Many Uses

Can Cool A Refrigerator Or Run A Motor

One of the products of oil and gas wells is a condensable gas, propane. Under compression it is a liquid, but it released to atmospheric pressure it becomes a gas. When it changes from a liquid to a gas it has properties similar to dry ice, solid carbon dioxide. It has frequently been suggested that propane could be used for a dual purpose with complete opposite effects. It could first be evaporated from the liquid state through coils of pipe to cool a refrigerator and the vapor could then be run to a gas stove, where it could be burned for heat. Its parallel application applied to motor trucks transporting perishable foods is described in "Food Industries."

Copies Will Be Preserved

Signed Trade Agreement With U.S. In Vault At Ottawa

Carefully guarded by its temporary custodian, Norman Robertson of the department of external affairs, one of the two specially prepared official copies of the Canada-United States trade agreement, with the signatures of Prime Minister King and Secretary of State Cordell Hull, was brought home to Ottawa. It will be placed in a vault and preserved in isolation for posterity. Its mate will suffer the same fate in Washington.

Soil Survey

During the past summer the Manitoba Soil Survey under the direction of Professor J. H. Ellis of Manitoba University has made a reconnaissance soil survey of approximately 1,774,080 acres in the drought area of southwestern Manitoba.

Took Name From Islands

The Canary Islands were called "Canaria" by Pliny, because of the multitude of dogs of a great size found there. The domesticated canary took its name from the island, and not the islands from the bird.

Increase In Dairy Herds

A survey of farms on the Lethbridge Northern Irrigation area shows an increase in dairy herds and a steady rise in prices for cream. There are altogether 3,500 cows of which about 2,400 are Holsteins in the district, but with 100,000 acres available these numbers are capable of considerable increase.

Terminates Annual Gifts

Rockefeller Believes Sectionalism In Church Is Wrong

Pursuing the traditional practice of his father, John D. Rockefeller, Jr., has terminated his annual monetary gifts to the Northern Baptist Church in the belief that inter-denominationalism is the best service of Christian religion.

In a searching letter to the Northern Baptist convention, written March 7 last, but revealed only recently, the son of the founder of one of the world's greatest fortunes informed the church that henceforth any future gifts would be only to specific agencies of the church.

"I have long felt," he wrote, "that this denominational emphasis is a divisive force in the progress of organized Christian work and an obstacle to the development of the spirit and life of Christ among men."

To hold young people, Rockefeller said, who are largely uninterested with denominational distinctions, the church must work with them "in relegating the non-essentials to a place of secondary importance and stand with them for the fundamentals of Christian duty."

Rockefeller, the largest individual donor to the church, has in the past made annual donations ranging from \$250,000 to \$1,000,000 to the general budget of the Northern Baptist convention.

VICKS VAPOR-NOL

Geological Surveys And Investigation Program Have Brought Results

Hitherto unclassified regions believed favorable for gold production in the west and copper-nickel mineralization and natural gas-petroleum areas in the east have been disclosed this year by the federal \$3,000,000 geological surveys and investigation program, Dr. Charles Camsell said at Vancouver.

Although the geological parties have not yet had time to compile their complete reports, the program has been successful in classifying these unknown districts, the deputy minister of mines told delegates to the western meeting of the Canadian Institute of Mining and Metallurgy.

The program, which got under way last June, embodied 65 projects spread over the Yukon, Northwest Territories and every Canadian province with the exception of Prince Edward Island. Close to 1,000 persons were employed in the 188 field parties which engaged on the geological and topographical surveys.

The reconnaissance of the Yellowknife river district in Northwest Territories disclosed approximately 2,800 square miles, or 30 per cent, of the area, could be classified as gold prospecting territory, the deputy minister said.

Another project indicated some 200 square miles in Manitoba could be considered favorable for gold occurrence, and some unprospected areas with similar possibilities were found in Saskatchewan.

The party working in the Cranbrook area of British Columbia found that tests should be made of certain tertiary gold-bearing gravels which have been given scant consideration, Dr. Camsell said, while examination of mining properties in the vicinity of the main line of the Canadian National Railway in the coast provinces has directed attention to the economic possibilities of the region.

In the east perhaps the finding of copper-nickel mineralization of the Sudbury type in sporadic occurrences over a distance of 14 miles in an area southwest of Fort William-Port Arthur can be considered as one of the most interesting attainments. In addition, the same project disclosed some 300 square miles favorable to the occurrence of silver.

Surveys in the natural gas-petroleum region of southwestern Ontario indicated additional favorable areas in which to drill for gas, the minister stated.

Boitation of the scarcity of water for domestic and agricultural use in the southern prairie region of western Canada may hinge upon sources of artesian and ground water, Dr. Charles Camsell stated.

The prairie water problem was one of the largest individual undertakings under the \$1,000,000 federal geological and topographical survey recently concluded.

Nothing would be known, Dr. Camsell said, until the various parties had completed their reports.

Requires Six Months' Notice

To Terminate Trade Agreement Under Ordinary Conditions

Unless terminated by some extraordinary circumstances for which provision is made, the Canada-United States trade agreement will become effective Jan. 1, 1936, and terminate Dec. 31, 1938. Formal ratification by King George will be obtained through the usual parliamentary action at Ottawa, while President Roosevelt, under the powers vested in him by congress, will proclaim its ratification as chief executive of the United States.

After Dec. 31, 1938, the agreement will remain in force until six months after either party serves notice on the other of a desire to end it. Revision of the agreement because of exceptional circumstances may be obtained with 30 days' notice by either party.

Prime Minister King took his power to negotiate from sections four and 11 of the Customs Tariff Act, which authorizes the government to extend most-favored-nation terms and to reduce tariffs without act of parliament, but not to raise tariff rates.

President Roosevelt had authority from an act of congress passed June 19, 1934, empowering him to negotiate trade agreements with foreign countries with a latitude of 50 per cent. upward or downward from existing tariff rates. He had no power to place on the free list any commodity presently dutiable but could bind his country for a period of three years, subject to renewal to maintain existing free lists.

No Doubt About It

The Victoria, B.C., Times says delivery cars frequently dart through the streets and turn corners as if their drivers feared their vehicles would fall to pieces if they did not operate at 40 miles an hour. Young men speed recklessly in calling upon their girl friends as if they were apprehensive that some rivals would beat them to their charming objectives, some of whom may not want to see them at all.

Swedish servants sit at the table while the master of the house and his family wait on them on Christmas Eve.

Maritime Freight Rates

Council Declares Freight Rate Act Is Unenforceable

Ontario council opposing an application before the board of railway commissioners for Canada at Montreal, N.B., created a sensation by flatly declaring the Maritime Freight Rates Act unconstitutional. The "provisional objection" came from Joseph Sedgwick, K.C., representing the Ontario department of agriculture at the hearing of the maritime transportation commission's application for a reduction in potato rates.

"I am a little afraid to answer my friend now," responded C. J. Burchell, K.C., Halifax, counsel for the commission. "I am afraid that if I said what I would like to say I would say too much. So I am going to say, I say just as quietly as I can that Ontario is still part of Canada. It is not a foreign country. Heretofore, we have had no sympathy from the great province of Ontario as well as hearty sympathy from Quebec in our problems down here."

Mr. Burchell had declined to claim for extending to the maritime provinces a reduction of three cents a bushel, granted in the freight rate on potatoes to and from points in Ontario and Quebec. The case was entered primarily as a test of the validity of section eight of the Maritime Freight Rates Act, which gives the maritimes a statutory advantage of a 20 per cent. reduction in freight rates. The section provides that this advantage is to be maintained.

Punishment Fits Crime

Sentence Given Boys By New Jersey Judge Seems Wise

Three 16-year-old boys in Montclair, New Jersey, are going to have plenty of scope to exercise their bent for mechanics in the next year. Following a sentence of a New Jersey judge, they will also pay fines of 50 cents each per week for the year, and on Monday and Wednesday evenings they will attend night classes in automobile mechanics.

That would make a good excuse to the judge, so instead of sending the boys to reform school, he sentenced them to spend every Saturday afternoon for the next year in the police garage, where they will wash, grease and help repair the police cars; they will also pay fines of 50 cents each per week for the year, and on Monday and Wednesday evenings they will attend night classes in automobile mechanics.

The trio will get a good training and they will be able to exercise to the limit their yen for tinkering with things mechanical. In fact, by the time the year is up the boys may be so tired of washing and greasing cars, they will be sorry they strayed from their straight and narrow. Further, there will be no harm about washing and greasing a car under police supervision. The boys cannot pose as bold, bad men. Instead they will be quite chastened.—Windsor Daily Star.

The Value Of Experience

Lessons We Learn Can Never Be Set Aside

One thing must not be forgotten in the welter of new creeds and shifting moral ideals that characterize modern thought. That is that the lessons of experience cannot be set aside. The ideals that have emerged through centuries of human struggle are as fixed for our practical guidance as the stars by which we determine our calendar and steer our ships. The deep faith in which generations of thoughtful men have found strength and assurance are valid still. Life, after all, is simple, if we live it simply. All that is required of any man is that he be true to himself, loyal to his obligations, great hearted and kind in his relations with neighbors.—Minneapolis Journal.

Sowing Rice From 'Plane

Method Carried Out In Russia On Large Scale

Visitors to the Ukraine have been surprised to see airplanes swooping over the fields and bombing them—with rice. This method of sowing has already been tried out with some measure of success in other parts of Russia, and it is now being carried out on a much larger scale. Sowing by airplane has one great advantage. It can be done when the earth is still covered with snow and ordinary sowing implements would be useless.

Huge Clock For Airport

The world's largest horizontal clock, which is 30 feet in diameter, was tested before shipment to the new Rand airport, South Africa, where it will be visible to arriving flyers at a height of 3,000 feet.

Ticks can live eight months without water and three years without food, scientists report.

Sound travels faster in warm weather.

Old Custom Revived

We Learn That Night Caps Are Coming Into Their Own Again. Who nowadays wears a night-cap? The general impression is that it came in as a fashion among the Physicians. It went out, as fashions have a way of doing, and we may see its return if our gilded youth continue to go about as in the days of "Incomparable Macassar," with hair oiled and curled like an Assyrian bull's. The world is coming round again to need tidies on the backs of parlor chairs, and of pillow-shams to hide the ravages which pomatum works on pillow-cases. A night-cap, like a dicker, saves a lot of laundering.

But there used to be a sounder reason for nightcaps than this. Chambers in former times were bitter cold in winter. Warming pans were run over the icy sheets at bed time, and then, with the head outside the covers, exposed to an air so "conditioned" that it froze the water in the pitcher to a solid lump, the guest might as well have stayed with his knob thrust out of the window. The nightcap may not have been a thing of beauty, but it was, as Browning says in "Red Cotton Nightcap Country," "Night's comfort of the human race," a necessary item in the wardrobe of the night.

The late Macdonald of Macdonald, whose castle of Dunvegan, in Skye, is the oldest inhabited house in Great Britain, used to recall to guest that when Dr. Johnson and James Boswell visited the place during their tour of the Hebrides, Dr. Johnson caught a violent cold, "due to his having been strangely slept without a nightcap." And in America, the nightcap was for long one of our democratic institutions, for Clement Moore in his immortal "Visit of St. Nicholas" has the line, "And mams in her kerchief and I in my cap." The kerchief and the nightcap, but as you may see in the drawings of Hogarth and Rowlandson and Cruikshank, the nightcap was the ordinary wear for both men and women. It seems to have continued in general use until houses began to be heated by means of stoves. But even now there are plenty of bedchambers in our country houses in which it is easy to catch one's death of cold for lack of a nightcap.—Boston Transcript.

Giving Series Of Lectures

People In England And Scotland Will Hear Ojibway Indian

Country Life is proud to have been the means of first introducing to the country—indeed, to the English-speaking world—the remarkable personality of Ojibway, a young Indian, who seems to have stepped out of the pages of Fenimore Cooper, gave a broadcast talk, which initiates a series of lectures to be delivered in almost every town in England and Scotland. Tall, dark, and austere, his likeness is to be by hypnotic photographs at the Exhibition of Nature Photography, where he is represented with his friends McGinnis and McGinty, the beavers. It was in 1931 that Country Life published his first book, "Men of the Last Frontier," in which he related the heroic deeds of the Indians, the men of the forest, ever falling back and back, together with the wild creatures and the peace of those dark lands, before the inexorable pressure of "progress." The publication of that first book is a landmark in the history of the Ojibway people, and it is a privilege to have the results analyzed the professor will release the information to the Canadian government as well as his own government for "their mutual benefit."

Mount Mazana was named years ago after it disappeared into the earth. Crater Lake, Oregon, rests where once towered this mighty mountain peak.

Chees is mentioned in Hindu literature at least 3,000 years before Christ. It was then called "chaturanga."

Schools Teaching Aviation

British Air Ministry Lends 'Plane And Instructors For Students

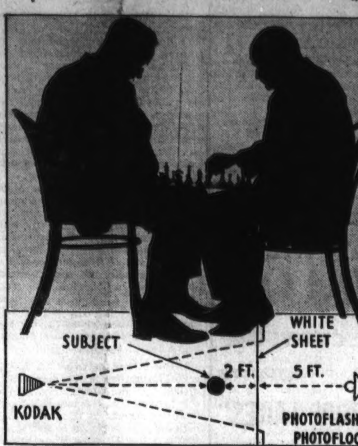

Rossall school, one of the most famous schools on the northwest coast of England, is acquiring an aeroplane from the government to give scholars general instruction in aviation. An arrangement has been in force for some time whereby any school showing interest in aeronautics can apply to the air ministry for an airplane (an aeroplane minus its motor) or an air-motor for instructional and lecture purposes. One of the aviation pioneers among the public schools was Highgate school, which has now had its aeronautical department, equipped by the air ministry, for six or seven years. More recently, the Royal Air Force equipment has been supplied for the use of cadets of the Thames training ship Worcester.

Another way the air ministry is helping to foster the spirit of "air-mindedness" is by appointing a kind of liaison officer to certain schools whose duty it is to lecture on aviation generally. This scheme was started with 10 schools, and an endeavor was made to appoint officers to these posts who had been educated at the schools concerned. There are no fewer than 42 schools taking part in this scheme.

Domestic radio-telephone service has just been inaugurated in China.

The SNAPSHOT GUILD

MAKE A SILHOUETTE

With the arrival of cooler days and nights that do not offer much encouragement for outdoor activities, the interest in indoor pastimes has increased. One of the most popular of these is the making of silhouettes. With this type of picture, even more than with ordinary snaps, it is important that the pictures tell their own story—unless, of course, you want simply a profile head and shoulders study—for you have only outlines to work with unsupported by perspective or detail.

The first essential of silhouettes is a perfectly black background, devoid of detail. And the easiest way to obtain such a background is to stretch a black sheet across a broad doorway between two rooms. It's important that the sheet be tacked up so that all creases and wrinkles are eliminated. To light up this background, a strong light must be put in back of it, about five feet away, either centered or placed directly back of the major feature of the picture. You have a wide choice of lamps for your lighting. You can use a couple of

ordinary 60-watt bulbs such as you use in your home lamps, or a Photoflood or Photoflash bulb. The latter are available at most electrical or photo supply shops at very low prices. The Photoflood bulb, which gives an exceptionally brilliant white light, is probably your best bet. Its life is about two hours of constant burning, thus it can be used for many pictures. Pose your subject about two feet in front of the sheet (on the side away from the light). See diagram. Place your camera on a tripod or table so that it is directly opposite your subject. When the picture is taken, the light that illuminates the sheet should be the only light in either of the rooms. Now about the exposures. If you use the two 60-watt lamps, you will need an exposure of about 10 seconds, with the lens well opened; with a Photoflood, a couple of seconds will suffice. Using the Photoflash which gives an instantaneous, vivid flash of light) set the shutter at "time," turn out all room lights, open the shutter, flash the bulb, close the shutter—and there you are—you've got your picture.

A little practice with silhouettes is worth volumes of instruction. Good silhouettes make excellent material for greeting cards, book plates, place cards and so on.

In making them, you can call any ingenuity and inventiveness into play. Try it tonight.

JOHN VAN GUILDER.

Alberta Buffalo For Germany

Collection Of Live Moose And Buffalo To Be Shipped Soon

Collection of live moose and buffalo from Alberta and an exhaustive research into the habits, biology and derivation of big game here has been completed by Dr. Lutz Heck, director of the Zoological Museum, Berlin. Between eight and 10 moose and 18 and 20 buffalo from Northwest will be shipped to Germany to be used for experimental breeding purposes to improve native game, the baron explained.

Preservation of big game throughout the world for posterity is sought by Dr. Heck. As soon as his scientific data has been completed and the results analyzed the professor will release the information to the Canadian government as well as his own government for "their mutual benefit."

Mount Mazana was named years ago after it disappeared into the earth. Crater Lake, Oregon, rests where once towered this mighty mountain peak.

Australia Is Said To Be The Third Best Customer Of Canada

Canadian Cattle At Glasgow

High-Grade Shipment Brought Satisfactory Prices At Sale

There was plenty of evidence that Canadian cattle are popular in Scotland at a special sale conducted recently by Wm. Roseworth and Sons, at Merlands Wharf, Glasgow, to dispose of a shipment of Canadian beef and dairy cattle. Bids came freely, and all the animals were disposed of at satisfactory prices.

The auctioneers stated that the dairy cows were the best lot offered for many months, and were of excellent types and breeding. In order to ensure that only the very best class of Canadian cows would be exported the Canadian Government had imposed strict regulations providing that all cows for export to the British market must pass an official tuberculosis and blood test prior to shipment. Any cows failing to pass such test will not be allowed to leave the Dominion. Further action by the Canadian government provided for skilled supervision of all export shipments as to class, breed, type, and conformation of the animals to ensure that only high-class stock went to the British market.

As the Canadian government had refused power to license exporters and could withdraw or cancel any exporters licence they were in a position to see that the trade was worked on a highly satisfactory basis. These actions by the Canadian government meant that all Canadian milk cows exported to Britain conformed to a degree of official testing, examination, and supervision which was higher and stricter than that applied to any other cows for commercial dairy purposes offered in any market.

Germans Like Canadian Eels

Hundreds Of Tons Taken From St. Lawrence River Every Year

Canadian eels, yards and yards of them, miles of them, so many in fact that if placed end to end they would turn a Hollywood statistician green with envy. One hundred tons weight of eels are taken from the St. Lawrence river each year. The business reaches a peak at this season and this shipment on the Beaverford is a record one as actual one hundred tons weight of eels were shipped in the Hamburg-bound liner.

Hardy individuals, it is claimed that the eels though frozen are still alive in the barrels, but do not show signs of life. It might be said that they are hibernating. Aboard ship they are placed in refrigerator space having a temperature of 20 below zero, which probably induces a chronic state of hibernation. The Canadian eels formed part of a cargo of over 6,000 tons weight. The Beaverford took to London and Hamburg.

Integrated Noise Meter

Instrument Registers Amount Of Noise Person Has Been Subjected To

An integrated noise meter designed by Dr. F. B. Haynes, of the Virginia Polytechnic Institute, is described by him in the current issue of "The Review of Scientific Instruments." The meter will measure and record the total amount of noise a person has been subjected to in any given length of time, just as the gas meter tells how much gas has been consumed. It operates very much like an ordinary watt-hour electric meter. A microphone picks up the noise and transforms it to a tiny electric current of proportional intensity. This controls the grid bias on an amplifying tube and lets varying amounts of "plate current" flow through a watt meter which continuously adds up the varying amounts of current which corresponds to the noise picked up by the microphone. The noise unit is the "decibel."

Elderly Information Man

Old-Timer Gives Offhand Historical Dates And Most Local Statistics

"Uncle Joe" Uloth, 92 years a resident of Guyabour county, N.B., is his district's unofficial "Who's Who." He knows all the old-timers for miles around by their first names, knowing just the right names, knowing their children and their grandchildren. He can give offhand birthdays, historical dates, dry and wet years and most local statistics.

None of this information is kept anywhere but in "Uncle Joe's" head. He says he thinks about it while he works. And speaking of work, this year he planted and looked after more than five bushels of potatoes and sowed four cords of wood.

Not In Same Class

Between Unemployed And Employed There Is Big Difference

Hon. Frank Carroll, in Quebec Chronicle-Telegraph says: In considering the number of unemployed we must not forget those who never worked, those who live on others, those who were too lazy, and those who lived by their wits in fleeing others. They are all numbered among to-day's unemployed. How many of this class will ever be converted to work is hard to say, but one assured fact stares them in the face. They will not find such an easy time in the world from now on as they did before the depression.

The longest of all regular English words is "antidisestablishmentarianism," which means "a doctrine of opposition to disestablishment."

Tippling—circles of stones that once held down the skin or blanket houses of Plains Indians—are still found widely in South Dakota.

said Mr. Brougham had not arranged
the interview between the priest and
the premier. This seems to have
been the last straw as far as Mr.
Brougham was concerned. What
will become of his promised history
of Social Credit in Alberta is not
known.

Some churches in Edmonton be-
came alarmed when Premier Aber-
hart last week announced that be-
ginning after his return from Ot-
tawa, he would commence a Sun-
day evening broadcast from Edmon-
ton, similar to that from the Prophe-
tic Bible Institute in Calgary. The
ministers were afraid the broadcast
might be given at a time when it
would interfere with regular church
services, and at one of the presby-
teries a resolution was passed ask-
ing the premier to avoid that.

Now, it appears, what Mr. Aber-
hart intends is to conduct a religious
service in the capital Sunday even-
ings at which he will broadcast
the announcements of government
doings and plans as he has been
doing in Calgary. This service will
of course, be held at usual church
hours. This information was given
by Hon. E. C. Manning, provincial
secretary, who will alternate with
the premier in conducting the ser-
vice in some hall here each Sunday.

Dismissal of between 15 and 20
relief inspectors in the unorganized
districts in the northern section of
the province will result this month
from the advent of 25 new R.C.M.P.
officers to supervise relief grants.
Acting Premier Manning stated
on Wednesday. Of these inspec-
tors, however, only four or five
have been paid, full-time employees
of the government, Mr. Manning
said. Most of them have been act-
ing as part-time inspectors and vol-

MORTGAGE SALE OF FARM PROPERTY

PURSUANT to the directions of
the Registrar and by virtue of the
Powers of Sale provided by "The
Land Titles Act" under a certain
mortgage which will be produced at
the time of the sale. There will be
offered for sale by public auction at
the Post Office in the Town of La-
combe in the Province of Alberta, on
Saturday, the 14th December, 1935, at
the hour of 2:30 o'clock in the after-
noon, the following property, name-
ly:

The South East quarter of Section
26 in Township 31, Range 28, West
of the 4th Meridian, containing by
admeasurement 160 acres, more or
less, and subject to the reservations
and provisions contained in the Pa-
tent from the Crown, excepting
thereout all mines, minerals, gas,
petroleum and valuable stones.

Terms of sale to be ten per cent.
cash at the time of the sale and the
balance according to the terms and
conditions to be made known at the
time of sale or upon application to
the vendor's solicitors.

The above property will be offered
for sale subject to a sealed
reserved bid and free from all en-
cumbrances.

The vendor is informed that the
above property is situated at about
fourteen miles from the town of La-
combe at which point is the nearest
Post Office. The nearest grain ele-
vator is at Gull Lake, 6 1/2 miles dis-
tant from the property, and the near-
est school is one-half mile from the
property.

The land contains 160 acres of
which 110 acres are under cultivation.
There are approximately 50
acres of brush and 30 acres of land
seeded to bromegrass. All of the prop-
erty could be cultivated if cleared.

The soil is a black loam, part
chocolate, six inches to two feet
deep, with clay subsoil. There is a
drilled well on the property. The
property is all fenced, and three-
quarters of a mile is cross-fenced,
with 2 and 3 strands of barbed wire
and poplar and tamarac posts.

Buildings on the property are: 1
frame dwelling with shingle roof,
24 x 24; 1 frame barn with shingle
roof, 20 x 30; 1 frame hen house,
board roof, 12 x 12; 1 frame hog
house, board roof, 12 x 26; 1 frame
and slab granary, board roof, 12 x
16; 1 frame well house, no roof.

For further particulars and con-
ditions of sale, apply to Messrs.
Newell, Lindsay & Ford, Bar-
risters, Canada Permanent Building,
Edmonton, Alberta.

Dated at Edmonton, in the Province
of Alberta, this 27th day of
September, A.D. 1935.

Approved

unary workers without pay. The
officers who are to replace them
are expected to remain here all win-
ter.

Denial was given to a rumor this
week which gained considerable
ground that the Alberta government
was contemplating a 50 per cent tax
on all incomes over \$5000. "Such
figures have never been considered
or mentioned in the cabinet," Hon.
E. C. Manning stated. He pointed
out that the policy of the Social
Credit movement was to increase
purchasing power and not to limit it.

Ex-premier R. G. Reid, of the
former U.F.A. administration, took
up the cudgels in defence of the
Farmers' government during the
week and, in an interview denied
that the U.F.A. government had left
the province's finances "in a deplorable
condition" as stated by the
present premier. He declared the
re-election of the U.F.A. government
would have prevented the run on
savings certificates which took place
when the Social Creditors came into
office. He claimed the former
government had met and weathered
more severe crises than that con-
fronting the present administration.
And he asserted the credit of the
province was not in any way or to
any extent impaired by the policies
of his administration.

To this the Social Credit govern-
ment deigned to make no comment.

Joan Crawford at The Avalon in "No More Ladies"

They laughed at love, until it hap-
pened to them. Is the sequel of the
play, "No More Ladies," showing
at the Avalon Theatre this week.
The popular screen stars Joan Craw-
ford and Robert Montgomery take
the leading parts in this picture,
supported by the laughable Charlie
Huggles, together with Franchot
Tone and Edna May Oliver. Geor-
geous Joan Crawford the "hard to
get" girl goes soft and falls desper-
ately in love with "hard to hold"
Bob Montgomery, and proves a wife
can be a play girl just like a hus-
band. It is a well screened picture
and shows glamorous Joan, never
more beautiful, in a wealth of new
gowns. Next week the Avalon pre-
sents a double feature Katherine
Hepburn in "Alice Adams" which is
a 4 star picture, and Tom Keene in
"Crossfire."

The snake charmer connected
with the circus died the other day
while the show was en route. The
manager of the show telegraphed
the parents of the man and said:
"John Skinner died suddenly today.
Advise us to discontinue."
In a few hours the answer was
received. It read: "We are heart-
broken. His disposition was mighty
onery."

Where You Buy With Confidence

CANADIANS AND THEIR INDUSTRIES—AND THEIR BANK DAIRYING.

HENRY: "Angus, do you ever think of the time
we started this dairy business?"

ANGUS: "You bet I do, Henry. It all started
with me driving 'that milk route' at \$20 a month
and board. I worked early and hard for what I got,
but the turn came when the boss was willing to
sell out. The Bank of Montreal knew I was chafing
from the way my savings account had grown
steadily. They helped a lot by lending me some
money—on good security, of course; it gave me
a good start. I still worked mighty hard, but the
profits made me forget I was so tired. We have a
nice balance at the Bank now."

HENRY: "Yes, and you took me in as a partner
and gradually we worked up to a fine herd of our

own and later a modern dairy outfit. And don't
forget what our wives and children did, Angus."

ANGUS: "No, indeed! Even the girls joined calf
clubs and borrowed money from the Bank to
buy the first fine stock. They did their bit in
building up our present prize-winning herd."

Not only are the largest dairy concerns in Canada
customers of the Bank of Montreal, but hundreds
of independent dairy farmers as well. Large and
small, they keep their business deposits and sav-
ings at the Bank and borrow at times for seasonal
requirements. Many of them call on the Bank for
other services, such as credit information, market
conditions. Many of them have their bonds and
other valuable papers with the Bank for safekeeping.

How To Prevent Goitre, Joint Ill and Hairlessness

Following long winters with deep snow, as this winter promises to be, a great deal of trouble is usually experienced with hairlessness in young pigs, goitre in calves and lambs, and joint ill in foals. According to information received from the Dominion Experimental Station, Lacombe, these troubles may be traced to a lack of iodine in the thyroid gland of the pregnant female, and losses from this cause may be avoided by feeding iodine, in the form of potassium iodide.

Potassium iodide has a generally stimulating effect, toning up the whole system, and exerts a particularly strong influence on the generative organs. Females which are apparently non-breeders will often become pregnant after this drug has been administered for a few months.

For cows, dissolve two ounces of potassium iodide in a cup of warm water, sprinkle the solution over 100 pounds of salt spread evenly and in a thin layer on a clean floor, and mix well. When the salt is dry place it in a box where the animals have free access to it.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

Ruth Dorsay Wins Prize Essay Contest

The prize essay on home made candy, which was competed for by Grade VIII pupils of the Lacombe public school, and offered by Bill Swanson's confectionery, was won by Ruth Dorsay, who will receive for her efforts a box of home made candy. Many entries were received, which all had merit, but the judges had a difficult time selecting the winner. The prize essay follows:

HOME MADE CANDY

The most wholesome and delicious candy known everywhere is home-made. It is not only wholesome and delicious but pure, clean, and appetizing.

If you want plenty for your quarter, And also for your dime.

Trade at Bill Swanson's.

And be there on time.

The only wholesome candy

I don't factory make

I found at Bill Swanson's.

'Twas the very best in grade.

Home-made candy has a real distinct natural flavor to please everyone so why not buy some now. This candy is not as expensive as the factory-made. The cleanliness and neatness gives it a good appearance. Added to this is the freshness which gives good quality. Only the purest food products are used in the making of home-made candy.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water.

MORRISON & JOHNSON LTD.

FARM HORSE IN WINTER

The winter feeding of the farm horse requires somewhat more thought than when he is engaged in heavy work at other times of the year. The horse in his attitude to man differs from all other classes of stock in that he produces energy and not food, states the pamphlet on the Feeding of Horses, now available from the Purity and Extension Branch, Dominion Department of Agriculture. This fact alone explains to a large degree the greater prevalence of disease with horses than with other animals. The proper realization of the relation of feeding to work done, the avoiding of overfeeding and watering or making sudden radical changes and regularity in working and feeding generally will go far towards the prevention of common ailments in the working horse, caused in many cases by failure to observe the essential points every horseman ought to know. For the horse which is not working during the winter, or for horses which merely require what may be termed a maintenance ration, it is recommended that for every hundred pounds of the horse's weight one pound of mixed hay, one pound of clean old straw, and one pound of turnips should be fed.

Don't Guess But Know

Whether the "Pain" Remedy You Use is SAFE?

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuralgia and migraines. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest, remember this:

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

CHAPTER XXIV.—Continued

The girl spoke softly, her dimple showing for a moment; but to her surprise Jack answered in all seriousness: "After what you did during the blitzkrieg? You know better, sis. But Matt's different from some boys, and I wouldn't like to think you'd hurt him."

Said Nancy, endeavoring to make her voice sound light: "You talk like Aunt Judy! She imagines that every boy who looks my way has lost his heart!"

"Well," observed Jack, "most any one would think that Matt had; but I never saw him act so happy and keyed up as he did this evening—and last night too. Say! will you ever forget how excited Mr. Adam was over your finding that crucifix? I think they're the finest family I ever knew. So enthusiastic, all of 'em. Do you suppose Dad's Mother'll let me come back next winter? With Mark in California studying forestry they'll be short of help here at the ranch; and gee! I'd like it more'n anything!"

"I'll say a good word for you," promised his sister; and then "Get back to bed, Jack. We must be up in good season, and it's long past midnight."

Despite her wakefulness, Nancy was up early next morning, though not so early as Matthew Adam, who had, according to Aurora, delivered milk at the Tubbs' abode before she was out of bed.

"He spoke through the window," she related, "and almost frightened Victor into a collapse. He said I was to tell Jack to be ready to ride down on the truck along with the trunks, and Mark and Luke and John (young John, I mean) and Mary Taylor and Juanita. I told him it would look like a straw ride, but he said, 'Who cares?' I'll have to admit that for a fellow who's sweet on a girl that's going two thousand miles away where he'll likely never lay eyes on her again, Matthew Adam looked pretty well resigned. And not more'n three days ago he resembled a man just comin' from the cemetery after buryin' his last relation. He's to drive the Ford with his father and mother and Miss Columbine and you, Nancy. I declare, if I wasn't quite so deady I'd suggest in between from the front seat and go too."

"Why not go down on the truck?"

ROUGH HANDS? NO!

Hinds restores smoothness which soap and water tasks steal away from your hands

HINDS
Honey & Almond
CREAM

By using rustless steel ribs an Englishman has designed a motor boat about 60 per cent. lighter than the usual craft of its size.

Squirrels use their tails for parachutes in long jumps.

suggested Miss Columbine, emerging from her bedroom.

"Among all them trunks and young folks and milk cans!" retorted the good woman. "No thank you, Miss Columbine. I have my pride, and there's house cleanin' to do, even if you are going home with Eve Adams for over Sunday. I must say it was real considerate of Eve to ask you, for this house'll seem about as cheerful as the tomb till we get used to it. Well!" (she sighed mournfully), "the best breakfast is ready, and you'd better eat it if you've any appetites, which I haven't myself. A cup of coffee and four doughnuts was all I could get down this mornin'. I've took the liberty of inviting Victor Tubbs to dinner, Miss Columbine. I need food, and goodness knows I couldn't eat a bite if I was to be here alone."

"The truck was gone at last, leaving Aurora flattered and rosy at Jack's farewell kiss."

"It's just as well," she said, waving her apron as a last salute, "that Victor wasn't here to see. He's still jealous. Nancy, after more than 20 years of married life; and though Jack didn't mean nothing in the world by kissin' me good-bye, Victor Tubbs might have misunderstood."

"Which proves that there's no fool like an old fool," declared Miss Columbine tartly. "Here comes the Ford, Aurora. I'd rather have Mark Adam drive us down the pass, but no doubt Matt will be careful with his load of old folks. Where are you going, Nancy? I thought everything had been brought down."

"I must have one last look at the view from my tower," the girl responded, laughing; but once in the familiar room she slipped to a carefully closed closet and drew forth something she had hidden.

"Will you send Matt up to get my suitcase, Aurora?" she called with charming innocence from the head of the steep stairs. "Those stupid boys have overlooked it."

The last ride down the historic pass was over. The station came into view, with an impatient "delegation," as Jack called it, on the platform. All too soon a gigantic engine roared past the waiting crowd, and slowly stopped; while, dazed and breathless, Nancy found herself mounting steps into the Pullman, a dusky porter armed with luggage leading her on, and Jack behind, stopping to call something to somebody.

"Section eight. This way, lady."

From her window Nancy looked out upon a sort of composite picture of that friendly gathering. Then, as the wheels turned, she caught the glimpse her eyes were seeking: Cousin Columbine in her scarlet midly, with Matt close by, bareheaded as she had been when first his hand slipped through the old lady's arm protectively.

"Dear Matt! She'd forgotten to tell him to look out for Cousin Columbine, but he knew. Something tightened in Nancy's throat. The landscape blurred. Then Jack was saying:

"Thank heaven that's over! I never felt so—so conspicuous in the life. Did you kiss every member of the Adam family? I don't know but I did! I'm sure I kissed everybody. A lovely mistake, of course. And I believe I must have kissed Cousin Columbine three times! Isn't she the dandelion old nurse? Kept a stiff upper lip right to the last minute, but I miss my guess if she wasn't crying. I wish I could feel that just to look at her. But some one will understand and cheer her up, sis. Of course somebody will!"

Jack was right. As the wheels moved faster and Miss Columbine's steady lip began to tremble, a firm young hand drew her away, back from the crowd that still stared, stupidly, it seemed, at the departing train.

"Listen," said Matthew. "Li-listen, Miss Columbine. It's not quite so awful as it seems, having her go. I promised not to tell even Mother till—till Nancy got home and could tell her; but she left a note for you in—in case you seemed too lonely; and anyway, I'll probably explode if I don't tell some one, so—so—so you see."

This was the old, shy Matthew, hesitating as if there were no words with which to say this thing; but as she glanced up, puzzled, Columbine Nelson surprised a light upon his face that startled her.

"What are you trying to tell me, Matthew Adam?" she demanded brusquely. "Stop stumbling over your words like that. I'm not a stranger. Don't keep me on tenterhooks a minute longer or I'll do the exploding. What are you trying to say?"

And at the reappearance of her own brisk self, Matt laughed, while in the face and eyes of an astonished baggage-man, he caught the oddly-attired lady in a bear-like hug.

"Only that Nancy is coming back," he told her joyously. "And—next time, Miss Columbine, she'll come—to stay!"

The End.

The German Olympic committee has invited Canada to send 30 boys and 30 physical education instructors to view the games, August 1 to 16, next.

By using rustless steel ribs an Englishman has designed a motor boat about 60 per cent. lighter than the usual craft of its size.

Squirrels use their tails for parachutes in long jumps.

The Weather

Onslaught of Winter in Western Canada Unpredictable

When winter settled down before the end of October in northern Alberta, the Edmonton Bulletin remarked quite truly: "Winter in this part of the world is an unknown quantity. Nobody knows with any certainty beforehand when it will arrive or what it will be like when it gets here."

And who's to blame for that? Why, the scientists, of course. They have been so busy finding out how to predict eclipses of the sun a hundred years in advance, that they haven't had time to learn how to predict weather changes 24 hours ahead with any assurance of accuracy.

Because of the slow progress in meteorological study, frequent errors are made in the official weather prognostications—errors for which the newspapers are sometimes blamed by an indiscriminating public.

Science can scarcely deny the charge of neglect of serious mal-distribution of research activities when it has got so far in astronomy and other branches, and has hardly begun to step out at all in the science of weather.

Of the Western Canadian winter, the Bulletin aptly says:

"Sometimes it comes upon us like the slow advance of an investing army, gradually lowering temperatures marking the transition from fall conditions and leaving everyone to decide for himself when the change over really occurs. At such times we have 'lingering summers' parting blooms delayed' and autumn extending even up to Christmas."

"This winter is different. Decidedly so. It came without any preliminaries, and came with a 'bang'."

And it came without any warning. Goodness knows how long the scientists would have neglected the weather if the growth of aviation had not called them to account, creating an insistent demand for more and better information about meteorological conditions, present and as far as possible into the future. Hence in the last few years science has been scurrying about trying to fill the order.

Lumbermen, also, should certainly be told in advance if it is to be, or not, a good winter for operating in the woods. The farmer should be told, at seat time, what the weather will be like for the next three months. And by the first of May every year, the young people ought to know whether it is going to rain or shine on the 24th so that they can plan accordingly.

It is up to the meteorologists—Winnipeg Free Press.

When Things Were Cheap

Salaries Paid Professional Men Were Very Meagre

One often wonders how professional men made ends meet 50 and 60 years ago on the meagre salaries which they were paid in those days. After paying the expenses of a college education they were left with their professional career on a salary which a laboring man would today consider insufficient to keep a very small family. A common salary paid ministers in those days was five or six hundred dollars a year, and many were somewhat improved, as the case is mentioned in which a well-known Methodist minister was paid the princely salary of five dollars a Sunday and was able to save a considerable amount from this sum in a year. About 40 years ago, conditions were somewhat improved, as the usual amount paid to ministers with a college degree was from \$750 to \$900 a year. Of course the cost of living was considerably less than it is to-day. A common price for butter was about 14 cents a pound, and eggs from six to ten cents a dozen. Round steak could be bought for three pounds for 25 cents, and other cuts proportionately small. Roots and vegetables were also low in price. But in those days there were very few luxuries as we find them to-day.

Cronophons and radios were unheard of. There were a few organs in the homes of the well-to-do, and pianos were a great luxury.

High Grade Bakery

About 500,000 bushels of high grade barley have been placed in storage at Calgary by a milling company. Another million bushels is being collected. Much of the present storage stock has been secured from growers who utilized special seed put out by the company in the spring.

Two barrels of Canadian apples were sold for \$2.083 at an auction sale in Cardiff. The proceeds went to charity, so that Canada has the credit of making a nice contribution.

A NEW SERIAL STORY

Arrangements have been completed for presenting to our readers a new serial entitled "Fleming's Folly," by that well-known writer, Lawrence A. Keating. This is an absorbing and exciting story of the western plains, and those who follow the intelluctuals as they appear each week, will be thrilled by the intensive situations. This story will be commenced in an early issue. Be sure that you do not miss the opening chapters.

IN NEXT ISSUE

4 to 5 TIMES More Quickly Digested than Cod Liver Oil

Tired, fed appetite used the stimulus of Cod Liver Oil. Scott's Emulsion helps give you a healthy, normal appetite PLUS added digestibility and vitality because it is an emulsified Cod Liver Oil in a solution of bone-building Hypophosphites of Lime and Soda. PLUS VALUES you get only in Scott's Emulsion.

SCOTT'S EMULSION

THE DIGESTIBLE COD LIVER OIL WITH THE PLUS VALUES FOR SALE BY YOUR DRUGGIST

Egypt Will Be Guarded

Britain Will Defend Country Against Any Foreign Attack

Having confidence in the League of Nations to enforce the rights of small nations, Egypt demanded independence from Britain and the removal of British troops from the Nile valley. This she has had for the last 16 years.

However, Egypt did not realize at the time, that her territory will always be coveted, as a key position for any country aiming at naval supremacy in the Mediterranean, African colonies, or mid-Eastern interests.

The Suez canal is partly responsible for this. But Napoleon considered Egypt the corner stone of his empire, when he dreamed of Eastern conquests, and that was 60 years before the canal was built.

Now an Italian force numbering over 30,000 is on the Libyan border and a vast army is near the Sudan frontier. Egypt would have good reason to worry were it not for the clause in the treaty of 1922, by which Great Britain made herself guardian of Egypt against foreign aggression.

Facts speak plainer than pacts and the Egyptians realize that the day is passed when a small nation can exist without the fear of aggression from great powers.

Signor Mussolini is quite candid in telling the world, they want Abyssinia for their surplus population and trade in raw materials. The most violently Anglophobe Egyptian cannot accuse Britain in exploiting his country along these lines, as there has never been any British colonization of Egypt and British firms compete on equal footing with concessions.

The present state of affairs has brought the Egyptians and British together, as they see their interests are mutual.

Alberta Rural Hospitals

Advisory Surgeons May Be Appointed For This Work

A suggestion that an advisory surgeon might be named, together with an interne, whose duties would be to visit the rural hospitals in Alberta once a month with the object of advising and assisting the local surgeon was given approval at the annual convention of the Alberta Hospital Association in Calgary. Suggestion was made by Dr. J. K. Mulloy, of Cardston.

The task of providing adequate surgery in Alberta where 50 per cent. of its patients are treated in hospitals of less than 100 beds was declared to be a difficult one by speakers at the opening session. Lack of proper equipment constituted a grave problem, it was reported.

Reduction For Families

Family season tickets for air travel in Europe are now being issued by aviation companies. Tickets are valid for either four months or a year. A family consisting of a man, his wife and two children under 21 may obtain marked reductions in fares.

One Chinese army compels its soldiers to be thrifty. Ten per cent. of the rate pay must be saved monthly, and none is exempt.

Of the total of 314,158 farms in Western Canada, 222,981 or 71 per cent. keep 1,310,038 head of milch cows.

Japan Looking For Tourists

Plans To Spend Large Sum On Advertising Campaign

Japan plans to attract more foreign tourists to the country. The Bureau of Tourist Industry in Tokio intends to spend nearly \$300,000 on an extensive advertising campaign in the next fiscal year. Offices will be established in Chicago, Paris and Shanghai. Publicity films will be circulated and advertisements placed in newspapers and magazines throughout the world.

Substitutes For Food

People In Hungary Are Buying Foxes And Crows

At the market at Keszemet (Hungary) crows are on sale, where they are fetching as much as three cents each. They are bought by the poor who make them into a form of "chicken broth." Foxes are also being sold by the farmers at a shilling a head. Never since the war have the inhabitants of this wealthy district been forced by hard times to resort to such substitutes for food.

Most species of birds require about a week to build a nest.

Swedish Economy Program

Request \$2,500,000 For Expansion Of Electrified Railroad System

The Swedish State Railways Administration Board has requested 10,000,000 kronor (about \$3,750,000) from the government for the next fiscal year, of which some 10,000,000 kronor (about \$2,500,000) will be used to expand its electrified railroad system. Construction will cover mainly additions to trunk lines and electrification of minor roads and spurs. All main lines on which much traffic is economically feasible already have been changed from steam.

At the beginning of 1935 electrified government lines totalled 1,331 miles. The expansion program calls for further electrification of 670 miles, of which 220 miles will be completed during 1935. The main reasons for this program have been economy in cost of operation, present cheapness of money and material, relief of unemployment and a greater independence from imported coal.

Electrification of Sweden's principal railroad line, 383 miles from Stockholm to Malmö, in the south, was completed October 1, 1935. Work on the 285-mile line from Stockholm to Gothenburg, on the west coast, was started in 1922 and completed in 1926 at a cost of 44,000,000 kronor.

Part of the line that runs north from Stockholm toward Lapland has been electrified. The new power will be installed only as far as Ånge, where the north-south line strikes an east and west line that crosses the Scandinavian peninsula from Sundsvall, in Sweden, to Trondheim, in Norway. After that will come completion of the west coast line from Malmö to Gothenburg, and this work may later be extended as far as Oslo, the capital of Norway.

New Death Ray

Designed To Use Against Insect Pests, Could Kill Human Beings

A "death ray" designed for use against insect pests but conceivably capable of being amplified to kill human beings was described at Baltimore to 150 scientists.

At the meeting of the eastern branch of the American Association of Economic Entomologists, Dr. James H. Combs, of the entomology at Rutgers University, explained that "sterilization" of insects by "radio waves" requires no more than a "couple of seconds." Animals, he said, develop heat more rapidly than do plants, so that insects can be killed by heat before the plant develops sufficient heat to harm itself.

His apparatus consists of an electrostatic field confined by two electrodes, by rapid oscillation of a 5,000-volt energy between the electrodes, he has killed insects. The electrodes change from positive to negative at a rate of 50,000,000 times a minute, Dr. Headie said.

Alberta Rural Hospitals

Advisory Surgeons May Be Appointed For This Work

A suggestion that an advisory surgeon might be named, together with an interne, whose duties would be to visit the rural hospitals in Alberta once a month with the object of advising and assisting the local surgeon was given approval at the annual convention of the Alberta Hospital Association in Calgary. Suggestion was made by Dr. J. K. Mulloy, of Cardston.

The task of providing adequate surgery in Alberta where 50 per cent. of its patients are treated in hospitals of less than 100 beds was declared to be a difficult one by speakers at the opening session. Lack of proper equipment constituted a grave problem, it was reported.

Phenomenal Doll Sales

Publicity Was Large Factor In The Success Of These Toys

Dolls have been the outstanding best sellers in the toy sections of departmental stores in the United States this year, according to national survey reports of toy world. Shirley Temple dolls, Dionne quintuplets and fairy princess dolls, the latter prompted by Colleen Moore's fairy doll house now touring the country, have won first place in over-the-counter sales.

Needless to say, the newspaper, movie and magazine publicity has been a big factor in the success of these toys. As a result of this year's phenomenal doll sales, the stores also report a fine demand for doll clothes and accessories.

Velocipedes and bicycles held a firm place during the summer months and are expected to maintain a strong position with Santa Claus this Christmas.

The four best selling games of the past month, according to one survey, were "Monopoly," "Pitman," "Band of Pachelbel" and "Badminton," all made by different manufacturers.

Old Chief Enters Movies

Aged Indian Dresses In Ceremonial Costume And Dances Fun Dance

Chief David, 100-year-old Sannich Indian of Vancouver Island, danced his way into the movies recently. When cameramen making a picture there inquired for someone who could interpret the ancient sun dance of the tribe, this grizzled old chief put on his ceremonial headdress and grunted his readiness to begin.

He went through the difficult movements of the dance without faltering. Then he told about his boyhood—how he had watched his tribesman attack old Fort Victoria back in 1843.

Accepts New Office

Lady Tweedsmuir, wife of the Governor-General, has accepted the office of Grand Patroness of the Canadian National Poppy Campaign. In so doing Her Excellency follows the precedents of the Countess of Beaulieu and Lady Willingdon.

The cemeteries of London total in area six times the size of Hyde Park, which covers 360 acres.

New York City still contains approximately 20,000 horses and 600 stables to house them.

Lighthouses are built round to present less surface resistance to waves and wind.

Your average American buys only two books a year.

Fattening Calves to Make Baby Beef

At this season a great many calves are being put on feed, for competition in baby beef shows in the spring. Calves for feeding should be good representatives of their breed—low-set and thick-fleshed, with plenty of quality and constitutional vigor. For best results they should be put on feed when between five and six months old, preferably before weaning, so that they will not lose their calf fat. They should be finished at nine hundred pounds.

The Dominion Experimental Station, Lacombe, recommends that for the first week or ten days the calf should be fed a mixture of three parts (by weight) of oats to one of barley. The proportion should then be gradually changed until toward the end of the feeding period the calf is receiving three parts barley to one of oats. As variety in the ration is extremely valuable wheat may well be used to replace up to half the barley. All grain should be ground.

At first the grain ration should be limited to two pounds daily. This amount should be slowly increased until the calf is doing well, consuming from one to one and a quarter pounds of grain per hundred pounds live weight.

When first put on feed the calf should be allowed all the good quality, well cured roughage it will clean up. However, as rapid fattening is dependent on heavy grain consumption the amount of roughage should be gradually decreased until, when on full feed, the calf receives only one pound of roughage to two pounds of meal.

If the roughage consists of non-leguminous hay ten percent of linseed oil meal should be added to the grain ration; but if alfalfa or sweet clover hay is fed five percent of oil cake meal will be sufficient. To avoid the mineral deficiency diseases common to calves on heavy feed a mixture of equal parts of salt and ground limestone or, for even better results, equal parts of salt and mono-calcium phosphate, should be added to the grain ration, two

pounds to each hundred pounds of grain. When it is not possible to have fresh water constantly available the calf should be watered at least twice daily.

Recipes

Apple Chicken Salad

Take six ripe Canadian-grown apples, scoop out the centres. Fill them with finely-minced cold cooked chicken, and season with minced green peppers and salt. Add enough cream to moisten. Place apples in a steamer and cook until almost tender. Place them on ice and serve with mayonnaise and lettuce.

Boiled Dressing for Salads

1/4 teaspoon salt, Cayenne, 1 tablespoon flour, 1 tablespoon butter, 1 teaspoon mustard, 1 tablespoon sugar, 1/2 cup boiling water, 1/4 cup vinegar.

Mix dry ingredients thoroughly. Add butter and egg slightly beaten; add gradually, add boiling water. When thoroughly blended add the vinegar slowly. Cook over boiling water, stirring constantly, until the mixture thickens. Strain and cool. If desired, the dressing may be thinned with cream.

Apple and Date Salad

Cut Canadian-grown apples into diced parts. Cut dates into similar pieces, using a quarter as much date as apple. To each pint of material add 2 tablespoons olive oil and mix well. Let stand in cool place closely covered for half an hour. Turn into bowl lined with lettuce leaves, add 1 tablespoon lemon juice. Serve with bread and butter at luncheon or supper.

Classified Advert. Rates

10 cents per count line, 40 cents minimum charge if paid in advance, 50 cents if charged.

Cards of Thanks, In Memoriam notices \$1.00 per insertion not exceeding seven lines. Over that space 12 cents per count line.

Bank of Montreal Shows Deposits Gain

The confidence reposed by the public at large in the Bank of Montreal is exemplified in an extraordinary degree in the Bank's annual statement for the year ending October 31st, just published. This shows deposits of \$576,944,866, compared with \$536,238,835 at the same date last year, an increase of \$40,706,031. This increase and a concurrent increase of \$43,800,000 in Government and other high-grade securities constitute the outstanding features of the statement.

Liquid Assets have increased to \$533,374,811, and are equivalent to 74.48% of all liabilities to the public. Cash in vaults and money on deposit with Bank of Canada stand at \$82,711,635, equivalent to 11.55% of public liabilities.

Holdings of government and other bonds and debentures amount to \$361,769,848, as compared with \$317,936,912 a year ago, an increase of over \$43,800,000. In keeping with the Bank's policy, the greater portion consists of gilt-edge securities which mature at early dates.

The immediately available cash is represented by cash on hand and money on deposit with the Bank of Canada of \$82,711,635; notes and cheques on other banks \$27,014,596, and money on deposit with other banks of \$37,764,631.

The profit and loss account shows earnings slightly down from the previous year. It also indicates that the Bank's taxes to Dominion and Provincial Governments are in excess of \$1,000,000.

Profit for the year amounted to \$4,007,302, against \$4,105,024 in the previous year. From the profit, taxes to Dominion and Provincial Governments required \$1,002,059, leaving for distribution \$3,005,243.

SANFORD ENGLISH'S PUBLIC AUCTION

Having received instructions from the owner I will sell at Public Auction at his farm, viz: N.E. 1/4 section 20, Township 40, Range 27, W.4, four miles west of Lacombe, on the Gulf Lake Highway.

"Grain Forum" Is Now Friday Radio Program

Friday, December 6, at 9 p.m. Central standard time and 8 p.m. Mountain standard time marked the opening of a new all-Western program, known as "The Grain Forum" broadcast over a net work of Western stations every Friday at the same hour. It is sponsored jointly by the Winnipeg Grain Exchange and the North-West Grain Dealers' Association and promises to contain several interesting features.

Tuneful music is provided by a string orchestra, known as the "Cereal Strings" and, on occasions, by a specially selected group of male singers.

Short, interesting addresses of not more than ten minutes duration will deal with various aspects of the production, distribution and marketing of grain.

An invitation will also be extended

We will have our Choice Christmas Meats and Poultry

on display this week.
